## ADMINISTRATOR'S REPORT July Update 2003

### Hawaii Health Performance Plan (H2P2)

Research on H2P2's capacity thresholds includes reviewing other state health planning agencies' standards. Sources that provide tracking of key indicators for the disease chapters now exist and may be included in the next H2P2 update. Preference will be to use existing reputable national and state sources that already are collecting this data.

### Subarea Health Planning Councils (SACs): H2P2 Activities

- Hawaii**      **H2P2 Chapter on Behavioral Health:** The Hawaii County SAC reviewed the latest draft of their transportation proposal for Hawaii County, the result of input from the Hawaii County Transportation Conference in April and from a recent study completed by the Department of Urban and Regional Planning at the University of Hawaii at Manoa. The plan to introduce the proposal to the key stakeholders is being implemented.
- Honolulu**    **H2P2 new Chapter on Long Term Care** – The Honolulu SAC did not meet this month.
- Kauai**        **H2P2 Kauai Health Priorities/Chapter on Behavioral Health** - Members began the exciting process of updating Kauai's health care priorities which will be published in the next H2P2 later this year.  
Substance Abuse: KSAC will continue to collect current information on Drug Prevention and Treatment Resources on Kauai for its distribution to island households and businesses.
- Tri-Isle**      **H2P2 Chapter on Behavioral Health:** The Tri-Isle SAC began the process of updating their H2P2 priorities. They will be reviewing the current status of health issues in Maui County and the progress that has been made in existing priorities. The SAC continues to explore Behavioral Health issues and programs as they consider the focus for their next project.

**Windward H2P2 Chapter on Diabetes and other Chronic Disabling Conditions:**

The SAC heard from guest speaker, Dr. Irwin Koff, on an innovative group model for Diabetes care. Dr. Koff plans to expand this model into the broader Windward Community, beginning in Punalu'u in September and hopes to have wide participation from physicians and people with diabetes. Greig Gaspar, SAC member from the Waimanalo Health Center, described the diabetes activities in Waimanalo. The SAC members are interested in gathering more information on diabetes activities and what SHPDA can do to support effort to reach more diabetics and improve their care. They will continue to consider this issue and begin their H2P2 update in upcoming meetings.

**West Oahu** The West Oahu SAC will be adding one new member and is scheduled to meet on July 31.

**Research and Statistics:**

Website update: The H2P2 Health Planning Data Tool is now available at: [http://www.state.hi.us/health/shpda/shdatatool\\_menu.htm](http://www.state.hi.us/health/shpda/shdatatool_menu.htm)

Utilization Survey: Completed distributing the report.
